

# Track Profits not Spreadsheets

Manage the complexities  
of harvest in one system.

It all comes down to harvest. After months of hard work, now's the time to see how decisions throughout the season paid off. Between managing the crew, marketing crops, keeping tabs on inventory, and tracking each bushel from field to elevator, it's tough to stay organized. Granular Business cuts the complexity of harvest, and keeps your focus on a strong finish.

## Manage Harvest Better

### Capture Critical Data

Track real-time harvest data in one system, and quickly see how your yield impacts your bottom line.

### Catch Errors Early

Keep track of every load and make sure each contract is delivered and paid.

### Manage Inventory On-The-Go

Track inventories by bin, location and owner, at all times, wherever you are.

### Skip the Back-and-Forth

Know where your team is. Assign and monitor work orders from anywhere.

### More Informed Crop Marketing

Use "what-if" scenarios to quickly see how yield and price impact your profitability and breakeven for less second guessing.

### Streamline Reporting

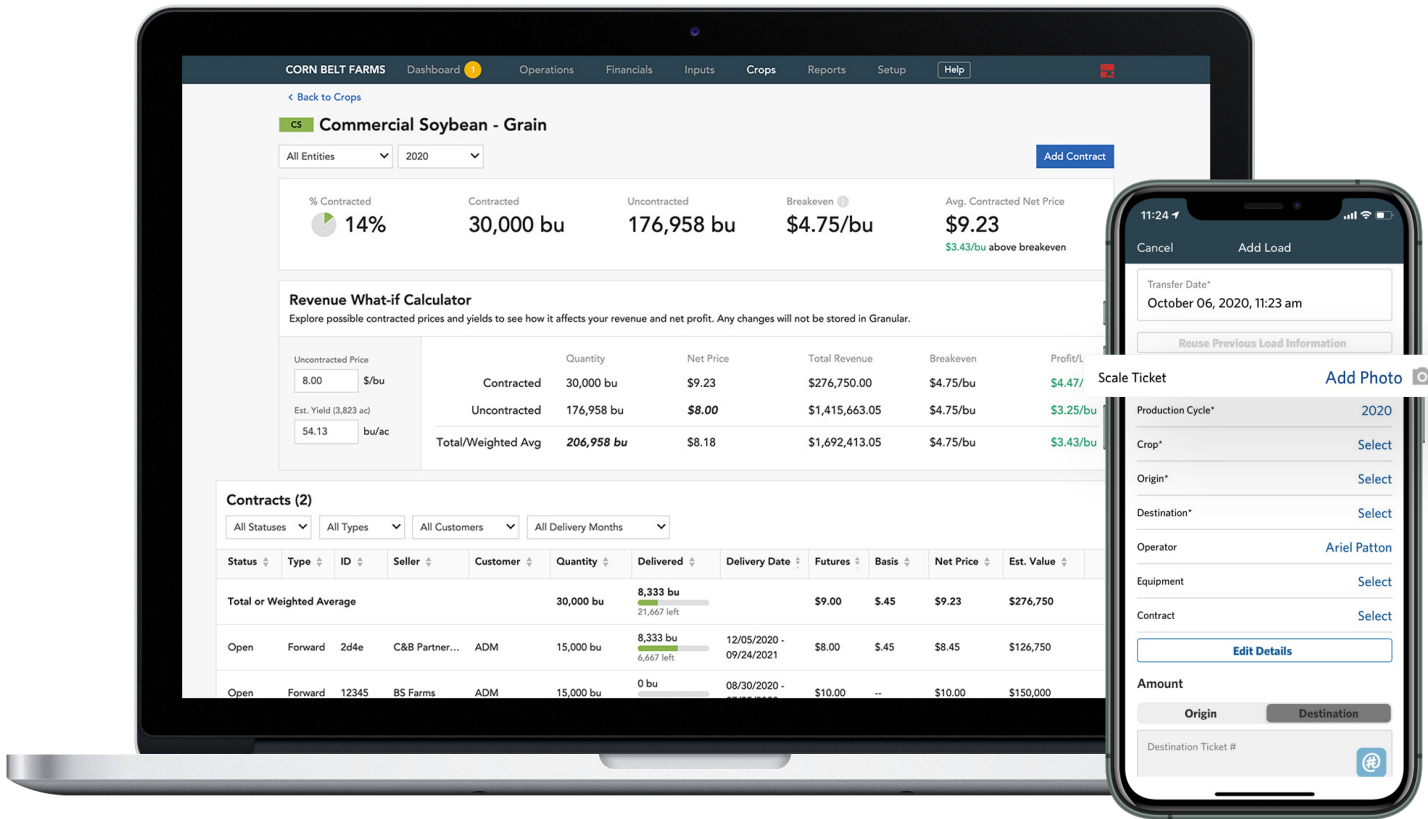

Save time getting the right information to the right stakeholder, whether it's your landlord, lender, or customer.

## New this Year: Easier Contract Management

- ✓ Keep track of all your contract details at a glance
- ✓ Market better with “what-if” price and yield scenarios
- ✓ Upload photos of scale tickets with the mobile app

### Short on help?

With our Pro Services options, we can help enter data and regularly monitor the harvest data flowing in from equipment, so you can get the most from Granular Business at harvest.

**“With Granular Business we know which fields are making the cut or not by understanding our field-level profits real-time and in season.”**
